

How the Survey was Conducted

Nature of the Sample: NBC News/Marist Iowa Poll of 1,012 Adults

This survey of 1,012 adults was conducted February 3rd through February 10th, 2015 by The Marist Poll sponsored and funded in partnership with NBC News. Adults 18 years of age and older residing in the state of Iowa were interviewed in English by telephone using live interviewers. Landline telephone numbers were randomly selected based upon a list of telephone exchanges from throughout the state of Iowa from ASDE Survey Sampler, Inc. The exchanges were selected to ensure that each region was represented in proportion to its population. Respondents in the household were selected by asking for the youngest male. To increase coverage, this landline sample was supplemented by respondents reached through random dialing of cell phone numbers from Survey Sampling International. The two samples were then combined and balanced to reflect the 2010 Census results for age, gender, income, race, and region. Results are statistically significant within ± 3.1 percentage points. There are 891 registered voters. The results for this subset are statistically significant within ± 3.3 percentage points. There are 320 voters in the potential Republican caucus electorate and 321 voters in the potential Democratic caucus electorate. The results for these subsets are statistically significant within ± 5.5 percentage points. The error margin was not adjusted for sample weights and increases for cross-tabulations.
