

How the Survey was Conducted

Nature of the Sample: NPR/PBS NewsHour/Marist Poll of 924 National Adults

This survey of 924 adults was conducted October 28th through October 29th, 2018 by The Marist Poll sponsored in partnership with NPR and PBS NewsHour. Adults 18 years of age and older residing in the contiguous United States were contacted on landline or mobile numbers and interviewed in English by telephone using live interviewers. Mobile telephone numbers were randomly selected based upon a list of telephone exchanges from throughout the nation from Survey Sampling International. The exchanges were selected to ensure that each region was represented in proportion to its population. Mobile phones are treated as individual devices. After validation of age, personal ownership, and non-business-use of the mobile phone, interviews are typically conducted with the person answering the phone. To increase coverage, this mobile sample was supplemented by respondents reached through random dialing of landline phone numbers from Survey Sampling International. Within each landline household, a single respondent is selected through a random selection process to increase the representativeness of traditionally under-covered survey populations. Assistance was provided by Luce Research and The Logit Group, Inc for data collection. The samples were then combined and balanced to reflect the 2016 American Community Survey 1-year estimates for age, gender, income, race, and region. Results are statistically significant within ± 4.2 percentage points. There are 822 registered voters. The results for this subset are statistically significant within ± 4.4 percentage points. There are 509 likely voters defined by a probability turnout model which determines the likelihood respondents will participate in the November 2018 election based upon their chance of vote, interest in the election, and past election participation. The results for this subset are statistically significant within ± 5.7 percentage points. The error margin was adjusted for sample weights and increases for cross-tabulations.

NPR/PBS NewsHour/Marist Poll National Adults. Interviews conducted October 28th through October 29th, 2018, n=924 MOE +/- 4.2 percentage points.

^National Registered Voters: n=822 MOE +/- 4.4 percentage points. Totals may not add to 100% due to rounding.

*Soft Democrats include registered voters who identify as "not strong Democrats" or Democratic leaning independents. Soft Republicans include those registered voters who identify as "not strong Republicans" or Republican leaning independents.

National Adults

Suspicious packages were mailed to prominent Democrats, critics of President Trump, and CNN. Given what you know about it, which one of the following factors do you think is mainly to blame for these kinds of incidents:

		The way President Trump conducts himself	The bickering between Democrats and Republicans	The way the media reports the news	None of these factors are to blame	Unsure
