This McClatchy-Marist Poll Reports:

GOP Over Dems on Enthusiasm for Midterm Elections

According to this McClatchy-Marist Poll, about one-third of registered voters nationwide -- 33% -- report they are *very* enthusiastic about casting their ballot this November.

Republican voters are more excited about their vote than are Democratic voters. 46% of Republican voters compared with 30% of Democrats are very enthusiastic about voting in the upcoming midterm elections. 23% of independent voters also express a high level of enthusiasm.

"This is what the campaign strategists are calculating. GOPers want to reinforce the gap in enthusiasm. The White House wants to close it," says Dr. Lee M. Miringoff, Director of The Marist College Institute for Public Opinion. "If it remains this large through the November elections, hold onto your hats when it comes to the makeup of the next Congress."

The oldest members of the national electorate are more enthusiastic than the youngest members. 43% of voters 60 and older, compared with 16% of those younger than 30, are very enthusiastic about casting their ballot in November.

Electorate Divides Over GOP Control of Congress

Do voters want control of Congress to be passed from the Democrats to the Republicans? 48% do, 46% do not, and 6% are unsure.

Not surprisingly, opinions divide along party lines with most Republican voters -- 92% -- saying they want their party to have control of Congress. 87% of Democrats do not. Independent voters divide. 43% of this all-important voting block want the GOP to gain control of the legislative branch of government while 44% do not. 12% are unsure.

More than three in ten members of the overall electorate -- 31% -- feel strongly that control of Congress should pass to the Republicans while 17% just think the GOP should win control. On the other hand, 23% of registered voters feel strongly that Republicans should

not win control of the House and Senate while the same proportion -- 23% -- just don't want them to gain a majority. 6% are unsure.

Republicans express more political passion here. Two-thirds of registered Republican voters -- 67% -- feel strongly about the GOP winning control while 37% of Democrats feel strongly that Republicans should *not* win control. Looking at independent voters, 24% are adamant that the Republicans take the reigns while 28% are strongly against the idea.

Republican or Democrat? Voters Divide Over Congressional Elections

Neither Democratic candidates nor Republican candidates have the edge in voters' minds. When asked which party's candidate they are more likely to support in November's midterm elections, 47% report they would back the Republican while 45% say they would back the Democrat. 3% say they would vote for neither the Democrat nor the Republican, and 5% are unsure.

However, 61% of voters who are very enthusiastic about voting this November say they are more likely to vote for the Republican candidate while 34% of those who express a high level of excitement are more likely to vote for the Democratic candidate.

There's little surprise that 92% of Republican voters say they plan to support the Republican candidate, and 90% of Democratic voters report they will vote for the Democratic candidate. When it comes to independent voters, a plurality -- 46% -- think they will back the Republican candidate while 38% believe they will support the Democratic candidate.

Anti-Incumbent Sentiment?

There has been a bump in the proportion of registered voters who say they will vote for their incumbent this November. 48% report they will cast their ballot for their current elected official compared with 43% who say they will vote for someone else. 9% are unsure.

When Marist last asked this question in its July survey, voters divided. 43% thought they would vote for someone else while 42% said they would support their incumbent. 15%, at that time, were unsure.

While there is a partisan divide on this question, the proportion of Republican voters who say they will vote for their current elected official has increased. 44% say they will cast their ballot for the incumbent while 49% report they will vote for someone else. 7% are unsure. When Marist last asked this question, 34% of Republicans wanted their incumbent, and a majority -- 52% -- wanted to seat a fresh face. 14% were unsure.

The proportion of independent voters who want to maintain the status quo has also increased. 43% support their incumbent while 47% want to elect someone new. 9% are unsure. In Marist's July survey, 36% backed their current elected official while 49% wanted a change. 14% were unsure.

Little has changed among Democratic voters. 57% want to keep their incumbent in office while 32% want someone else. 10% are unsure. In July, 55% backed their current official, 29% wanted to bring someone new into office, and 16% were unsure.

Tea Party Revolution? About a Third of Voters Support the Movement

Talk of the Tea Party dominates news headlines. But, does the average voter support the movement? Although a majority of voters nationally -- 55% -- do not support the Tea Party movement, a notable 34% do. This includes 11% who strongly support the movement and 23% who just support it.

How much support does the Tea Party have among the GOP? A majority of Republicans --56% -- share allegiance. Included here are 22% who strongly support it and 34% who support it. About one-third -- 33% -- do not support the Tea Party. Looking at Democratic voters, 76% do not back the movement. Independent voters who back the Tea Party are also in the minority. 34% of independent voters support the Tea Party with 10% strongly supporting it and 24% supporting it. A majority of independent voters -- 55% -- do not support it.

Chart a New Course, Say Residents

A majority of Americans -- 56% -- think the nation is headed in the wrong direction while 41% believe it is on the right track. 3% are unsure. There has been little change in the proportion of Americans who say the nation's compass is broken. When Marist last asked this question in July, 56% reported the country was moving along the wrong course compared with 37% who agreed with the trajectory of the nation. 7% were unsure.

Obama Approval Rating at 45%... Economic Views a Factor

For the first time since taking office, half of registered voters nationwide -- 50% -- disapprove of President Barack Obama's job performance. That's according to this McClatchy-Marist Poll. 45%, however, approve, and 5% are unsure.

While the proportion of voters who approve of the job the president is doing changed little since Marist last asked about it in June, there has been a slight increase in the proportion of voters who disapprove of the job Mr. Obama is doing. At that time, voters divided. 45% disapproved of Mr. Obama's job performance while 44% approved. 11% were unsure.

"Although President Obama's approval rating is largely unchanged, the number of those who disapprove of his job performance has grown since our last poll," says Dr. Lee M. Miringoff, Director of The Marist College Institute for Public Opinion. "This is also reflected in whether he has met voter expectations. Younger voters are especially disappointed when it comes to their hopes for the president."

Views of the president's job performance are partisan. Looking first at Democratic voters, 81% approve of the job the president is doing while 15% disapprove. 4% are unsure. In Marist's June survey, 75% of Democrats approved, 14% disapproved, and 11% were unsure.

Not surprisingly, most Republican voters disapprove of Mr. Obama's job performance. 82% have this view compared with 13% who approve. 6% are unsure. Three months ago, 78% of the national GOP said they did not like the way the president was performing in office, 14% approved, and 8% were unsure.

A majority of independent voters -- 54% -- now disapprove of President Obama's job performance. This compares with 40% who approve and 6% who are unsure. When Marist last asked voters nationally about the president's job approval rating, 49% of independents disapproved, 37% approved, and 15% were unsure.

It's no surprise that voters' views toward the future of the economy are related to the president's job performance. 68% of voters who believe the worst is yet to come with regard to the U.S. economy disapprove of Mr. Obama's job performance while 67% who say the worst is behind us approve.

Majority View Obama as Falling Below Expectations

President Obama is facing another unpleasant first. For the first time since becoming president, a majority of voters -- 54% -- report the president has fallen below their expectations. This is compared with 44% who say Mr. Obama has either met or exceeded their expectations. 2% are unsure.

According to Marist's June poll, half of registered voters reported the president fell short while 44% thought he met or exceeded their expectations. 6% were unsure.

Among voters who have a more pessimistic view about the U.S. economy, 62% think the president has fallen short while a majority of those who are more optimistic -- 53% -- say he has either met or exceeded their expectations.

And, President Obama may have campaigned on the platform of change, but the change he is affecting is perceived by a plurality of voters nationwide -- 41% -- as change for the worse. 37%, though, believe Mr. Obama is changing the nation for the better while 21% think there has been no change at all. Just 1% are unsure.

In Marist's June survey, voters divided. 38% thought the president was changing the United States for the better, and 38% reported he was changing the nation for the worse. 21% thought he did not create any change. 3% were unsure.

Once again, the economy comes into play. 58% of those who think the nation's economy will get worse report the president has changed the nation for the worse while 59% who say the worst of the nation's economic problems are behind us believe he has changed the country for the better.

President's Favorability Below 50%... Increase in Those with Unfavorable View

To compound matters for the president, there has been an increase in those who have an unfavorable view of him. 49% of voters have a favorable impression of Mr. Obama compared with 48% who have an unfavorable one. 3% are unsure. In Marist's June survey, half of the electorate perceived the president positively while 43% held him in lower esteem. 7% were unsure.

Rave Reviews for Michelle Obama

65% of the national electorate have a favorable view of First Lady Michelle Obama while nearly one-fourth -- 24% -- have an unfavorable impression of her. 11% are unsure.

When Marist asked this question last December, 68% thought well of Mrs. Obama while 20% said they were not fans. 12%, at the time, were unsure.

Most Democratic voters -- 84% -- and nearly two-thirds of independent voters -- 66% -- view Mrs. Obama in a positive light. 46% of Republicans think well of Michelle Obama.

Just Call Him, "Unfavorable Joe"

Looking at Vice President Joe Biden's favorability rating, a plurality of voters -- 46% -- have an unfavorable impression of Mr. Biden while 39% view him in a positive light. 15% are unsure.

Not surprisingly, there is a partisan divide on this question. 67% of Democrats view Biden *favorably* while 69% of Republicans have an *unfavorable* impression of him. However, even 19% of Democrats have a negative opinion of Biden. A majority of independent voters -- 52% -- have an unfavorable view of the vice president.

Romney Rooted On by One-Fourth in Primary Matchup

The list of potential Republicans to challenge President Obama in 2012 is long, but there is little agreement among the national GOP and independent voters who are leaning Republican about who that candidate should be.

If the 2012 Republican presidential primary were held today, one-quarter of registered Republican voters and independent voters who are leaning Republican -- 25% -- say they would vote for former Massachusetts Governor Mitt Romney. Former Alaska Governor Sarah Palin receives the support of 18% while former Georgia Congressman Newt Gingrich is buoyed by 16%. An additional 16% of Republican voters including Republican leaning independents report they would back former Arkansas Governor Mike Huckabee, and 6% would cast their ballot for Minnesota Governor Tim Pawlenty. Indiana Governor Mitch Daniels receives 4%, and Mississippi Governor Haley Barbour garners just 2% nationwide. 13% are unsure.

Nature of the Sample: 1,005 U.S. Residents

This survey of 1,005 United States residents was conducted on September 14th through September 16th. Residents 18 years of age and older were interviewed by telephone. Telephone numbers were selected based upon a list of telephone exchanges from throughout the nation. The exchanges were selected to ensure that each region was represented in proportion to its population. To increase coverage, this land-line sample was supplemented by respondents reached through random dialing of cell phone numbers. The two samples were then combined. Results are statistically significant within ±3.0 percentage points. There are 815 registered voters and 369 Republicans and Republican leaning independents. The results for these subsets are statistically significant within ±3.5 percentage points and ±5.0 percentage points, respectively. The error margin increases for cross-tabulations.
