

How the Survey was Conducted

Nature of the Sample: National Poll of 1,029 Adults

This survey of 1,029 adults was conducted on December 2nd through December 8th, 2010. Adults 18 years of age and older residing in the continental United States were interviewed by telephone. Telephone numbers were selected based upon a list of telephone exchanges from throughout the nation. The exchanges were selected to ensure that each region was represented in proportion to its population. To increase coverage, this land-line sample was supplemented by respondents reached through random dialing of cell phone numbers. The two samples were then combined. Results are statistically significant within ± 3.0 percentage points. There are 873 registered voters. The results for this subset are statistically significant within ± 3.5 percentage points. The error margin increases for cross-tabulations.

Nature of the Sample: Adults

Nature of the Sample - National Adults		
		National Adults
		Col %
National Adults		100%
Registered Voters		85%
Region	Northeast	19%
	Midwest	22%
	South	37%
