With the death of Supreme Court Justice Ruth Bader Ginsburg, there is a vacant seat on the Supreme Court. Which statement comes closest to your opinion:	One, President Trump should fill the vacancy immediately	32%	33%	35%
	Two, President Trump should fill the vacancy but after the election regardless of who wins	7%	8%	7%
	Three, The result of the upcoming presidential election should decide who gets to fill the vacancy	55%	54%	54%
	Vol: Unsure	6%	5%	4%
As you may know, there have been protests across the country over the actions of police against George Floyd in Minneapolis and Jacob Blake in Kenosha, Wisconsin. Which concerns you more:	The actions of police against George Floyd and Jacob Blake	43%	42%	42%
	The actions of protesters looting or using violence	46%	47%	49%
	Vol: Unsure	11%	10%	10%

Nature of the Sample: NBC News/Marist Poll of 1,161 Michigan Adults

This survey of 1,161 adults was conducted September 19th through September 23rd, 2020 by The Marist Poll sponsored in partnership with NBC News. Adults 18 years of age and older residing in the state were contacted on landline or mobile numbers and interviewed by telephone using live interviewers. Survey questions were available in English or Spanish. Mobile telephone numbers were randomly selected based upon a list of telephone exchanges from throughout the state from Dynata. The exchanges were selected to ensure that each region was represented in proportion to its population. Mobile phones are treated as individual devices. After validation of age, personal ownership, and non-business-use of the mobile phone, interviews are typically conducted with the person answering the phone. To increase coverage, this mobile sample was supplemented by respondents reached through random dialing of landline phone numbers. Within each landline household, a single respondent is selected through a random selection process to increase the representativeness of traditionally under-covered survey populations. The samples were then combined and balanced to reflect the 2017 American Community Survey 5-year estimates for age, gender, income, race, and region. Assistance was provided by Luce Research for data collection. Results are statistically significant within ± 3.6 percentage points. There are 1,082 registered voters. The results for this subset are statistically significant within ± 3.7 percentage points. There are 799 likely voters defined by a probability turnout model which determines the likelihood respondents will participate in the November 2020 election based upon their chance of vote, interest in the election, and past election participation. The results for this subset are statistically significant within ± 4.3 percentage points. Tables include results for subgroups to only display crosstabs with an acceptable sampling error. It should be noted that although you may not see results listed for a certain group, it does not mean interviews were not completed with those individuals. It simply means the sample size is too small to report. The error margin was adjusted for sample weights and increases for cross-tabulations.
