

How the Survey was Conducted

Nature of the Sample: Marist Poll of 822 New York State Adults

This survey of 822 adults was conducted October 4th through October 7th, 2021 by The Marist Poll. Adults 18 years of age and older residing in the state of New York were contacted on landline or mobile numbers and interviewed by telephone using live interviewers. Survey questions were available in English or Spanish. Mobile telephone numbers were randomly selected based upon a list of telephone exchanges from throughout the state from Dynata. The exchanges were selected to ensure that each region was represented in proportion to its population. Mobile phones are treated as individual devices. After validation of age, personal ownership, and non-business-use of the mobile phone, interviews are typically conducted with the person answering the phone. To increase coverage, this mobile sample was supplemented by respondents reached through random dialing of landline phone numbers. Within each landline household, a single respondent is selected through a random selection process to increase the representativeness of traditionally under-covered survey populations. The samples were then combined and balanced to reflect the 2019 American Community Survey 5-year estimates for age, gender, income, race, and region. Assistance was provided by Luce Research for data collection. Results are statistically significant within ± 4.8 percentage points. There are 732 registered voters. The results for this subset are statistically significant within ± 5.1 percentage points. There are 389 registered Democrats. The results for this subset are statistically significant within ± 6.9 percentage points. Tables include results for subgroups to only display crosstabs with an acceptable sampling error. It should be noted that although you may not see results listed for a certain group, it does not mean interviews were not completed with those individuals. It simply means the sample size is too small to report. The error margin was adjusted for sample weights and increases for cross-tabulations.

NYS Nature of the Sample

		NYS Adults	NYS Registered Voters	NYS Registered Democrats
		Column %	Column %	Column %
NYS Adults		100%		
NYS Registered Voters		89%	100%	
Party Registration	Democrat	n/a	52%	100%
